

# Multi-Mention Learning for Reading Comprehension using Neural Cascades

## Reading Comprehension

Which famous novelist also wrote under the name Richard Bachman?

Stephen King /  
Stephen Edwin King /  
Stephen E. King /  
King, Stephen

## Distant Supervision

- TriviaQA (Joshi et al., 2017) with questions and answers taken from trivia websites.
- Wikipedia and web pages provided as sources of evidence, **independent** of the QA pairs.
- Documents contain the answer strings, but are not guaranteed to contain any **evidence** to answer the questions.

<b>Question</b>	Which US artist married Lee Krasner in 1945?
<b>Answer</b>	Jackson Pollock; Pollock; Pollock, Jackson
<b>Document</b>	Wikipedia entry for Lee Krasner (Excerpts shown)
<b>Start</b>	<b>Passage</b>
952	She lost interest in their usage of hard-edge geometric style after her relationship with Pollock began.
3364	Pollock's influence
3366	Although many people believe that Krasner stopped working in the 1940s in order to nurture Pollock's home life and career, she never stopped creating art.
4084	Relationship with Jackson Pollock
4089	Lee Krasner and Jackson Pollock established a relationship with one another in 1942 after they both exhibited at the McMillen Gallery. In the summer of 1945, they got married in a
4560	While she married Pollock in a church, Krasner continued to identify herself as Jewish but decided to not practice the religion.

## Challenges

- Read multiple documents in their entirety.
- Answers occurrences, though repeated, may not contain adequate evidence to answer the question.

### Longer Document Context

- Longer the context considered, better the chances of correctly answering a question.
- Tradeoff : efficiency.
- Simple feed-forward nets.**

### Multiple Mentions of Answers

- Not each mention of the answer is relevant or sufficient to answer the question.
- Need to **aggregate information** across multiple mentions.

## Multiloss Architecture

- Cascade** of models arranged by levels,
- Level 1 : Averaged Bag of Words
  - Span in context
  - Question + Span
  - Level 2 : Sentence in Context
  - Level 3 : Aggregating Identical Mentions

### Handling distant supervision:

- The exact occurrence of the correct span is treated as a **latent variable**.
- Probability of all occurrences maximized.

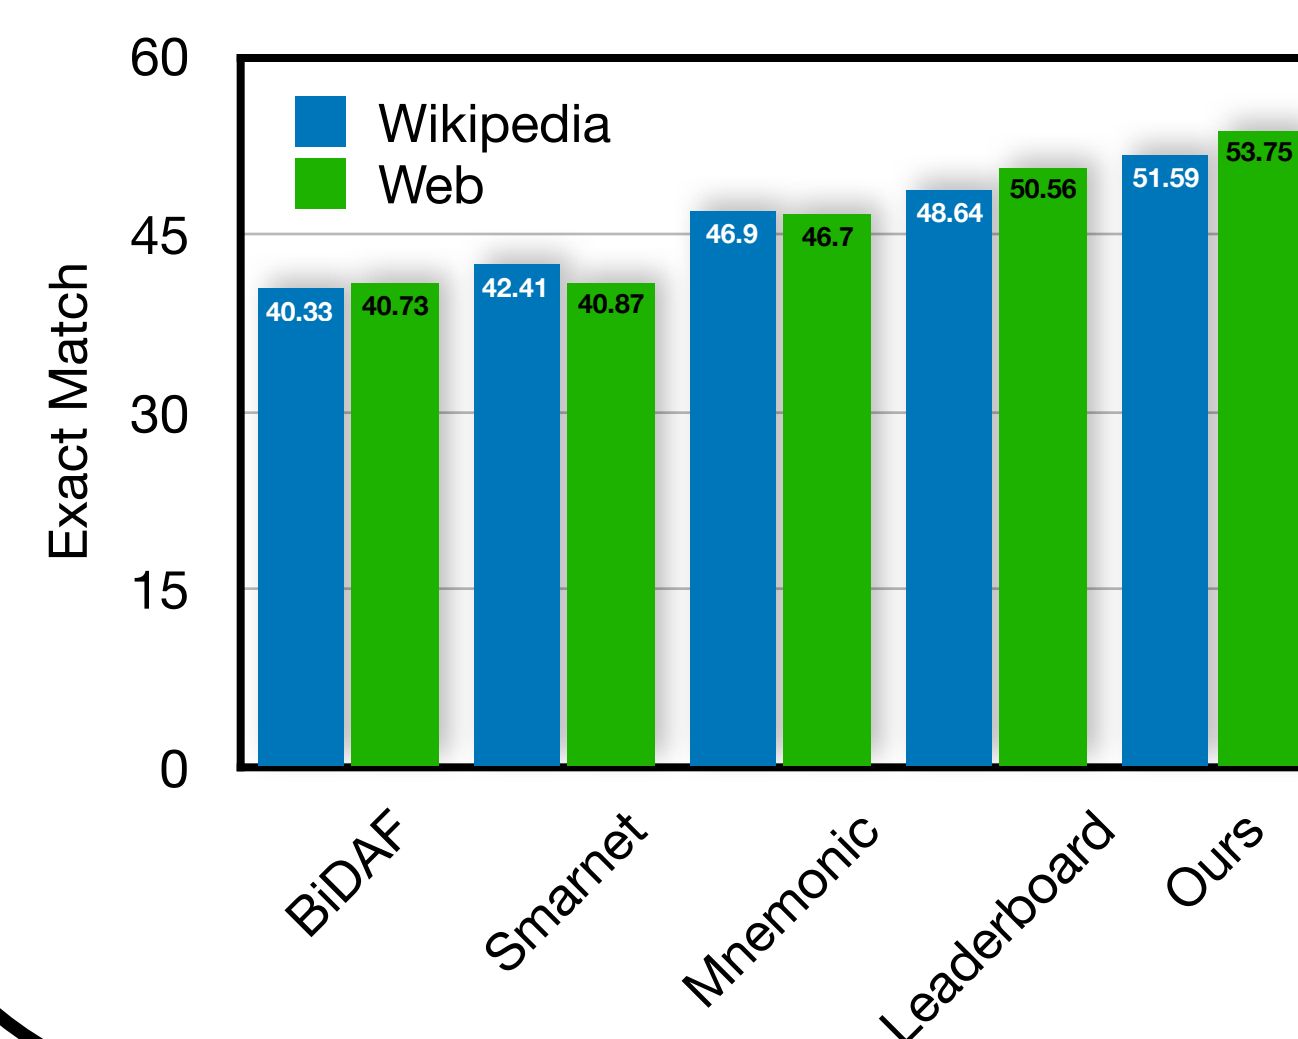

**Multiloss Formulation:** Each level is associated with its own loss (Al Rfou et al., 2016).

Richard Bachman is a pen name for fiction author Stephen King . Which famous novelist ... Bachman ?
